Professional Summary

Full-stack Software Developer who has designed, built, tested, and deployed 15+ complete products from scratch, spanning cloud SaaS platforms (CRM, ERP, Tasks, Forms, Commerce, Restaurant), desktop applications (POS, AI assistant), and mobile apps (React Native/Expo, Flutter). Previously a Front-End Developer building healthcare web applications with React.js, TypeScript, and Redux Toolkit. Able to architect a product end to end: monorepo setup, database schema, secure REST and real-time backends, multi-client UIs, Docker/cloud deployment, and Windows installers.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, Dart, SQL, PowerShell, Java, Python
Frontend: Next.js (13/14/15), React 18/19, Vite, Tailwind CSS, Shadcn/UI, Material UI, TanStack Query, Zustand, Redux Toolkit, RTK Query, Recharts, next-intl (i18n), Framer Motion, Angular.js, Bootstrap
Mobile: React Native, Expo (Router, EAS, Notifications, SQLite, SecureStore), NativeWind, React Navigation, Flutter
Desktop: Electron, better-sqlite3, tsup, electron-builder (NSIS/portable installers), Vitest
Backend: Node.js, Express.js, NestJS (TypeORM, WebSockets), Fastify, Socket.IO, NextAuth/Google OAuth, Passport, REST API design
Databases: MongoDB (Mongoose), PostgreSQL (TypeORM, Drizzle), SQLite, MySQL, Redis
Auth & Security: JWT with refresh tokens, RBAC, bcrypt/argon2, Helmet, rate limiting, CORS, CSRF, Zod/class-validator, XSS and NoSQL-injection protection, account locking, audit logs
DevOps & Cloud: pnpm, Turborepo, Docker/Docker Compose (Postgres, Redis, Nginx), GitHub Actions, Vercel, Render, Netlify, MongoDB Atlas, Neon, Supabase, Cloudinary
Testing & Tools: Jest, Vitest, Supertest (e2e), Postman, Git, GitHub, ESLint, Prettier, VS Code, Figma (Basic)
AI-Assisted Development: Cursor AI, Lovable, Replit

Professional Experience

Operations Executive – Process Jun 2026 – Present
Startek Aegis (Zomato Process) *Lucknow, Uttar Pradesh (Work from Home)*

- Handle customer and partner support requests for the Zomato process using a ticketing system, tracking each ticket through to resolution.
- Follow process guidelines and service-level targets while maintaining accurate ticket records and clear communication.

Freelance Full-Stack Developer Oct 2025 – May 2026
Self-Employed *Tamil Nadu*

- Designed, built, and deployed full-stack web, desktop, and mobile applications for local clients and self-initiated products (see Projects).
- Owned each project end to end: requirements, database schema, secure REST/real-time backends, UI, deployment on Vercel/Render/Docker, and Windows installers.

Associate Software Developer – Front-End Dec 2024 – Sep 2025
DataTerrain India Private Limited *Chennai, Tamil Nadu*

- Engineered scalable, responsive UI components using React.js and TypeScript, improving page load performance and UI consistency across multiple healthcare modules.
- Implemented efficient state management with Redux Toolkit and RTK Query, reducing redundant API calls and unnecessary re-renders.
- Integrated frontend components with RESTful APIs, handling loading, error, and success states for a seamless user experience.
- Collaborated in agile cross-functional teams to deliver 5+ healthcare web applications within deadlines; participated in code reviews, sprint planning, and daily stand-ups.

On-site Frontend Intern Feb 2024 – Sep 2024
IWAYY Technology Solutions *Vaniyambadi, Tamil Nadu*

- Engineered and expanded 4+ modules for an Employee Payroll Management System using HTML, CSS, JavaScript, PHP, and MySQL, supporting payroll workflows for 10+ employees.
- Enhanced 3+ UI modules and streamlined backend data handling, reducing manual processing time.

Projects

Mufar Commerce – ***Next.js 14, Expo/React Native, Express, MongoDB, JWT*** Vercel, Render
- Enterprise B2B/B2C distribution and order-management platform with full order lifecycle, nested categories, low-stock alerts, PDF invoices, WhatsApp sharing, and reports with CSV export.
- Built a Shadcn admin dashboard, an Expo/React Native client, and a secure Express API with JWT refresh tokens and GitHub Actions CI.

MuFar Business ERP – ***React, Vite, Tailwind, React Query, Node.js, MongoDB Atlas*** Vercel, Render
- Cloud ERP with mobile-first UX, inspired by BUSY, Tally, and Zoho Books: sales, purchases, customer and supplier dashboards, and low-stock alerts.
- Implemented JWT with refresh tokens, role-based access control, and Cloudinary media handling.

Mufar CRM – ***Next.js, TypeScript, Shadcn/UI, Recharts***
- Full-featured CRM covering leads, contacts, companies, opportunities and pipeline, activities, tasks, communications, reports, team, billing, integrations, and security settings, with API wiring.

Mufar Tasks and Mufar Forms – ***Next.js, NextAuth/Google OAuth, Shadcn/UI***
- Tasks: project management platform with kanban board, calendar view, teams, reports, billing, and Google login.
- Forms: form-builder and data-collection platform with analytics, multi-language support, and templates.

DineFlow – ***NestJS, TypeORM, PostgreSQL, Redis, Socket.IO, Flutter, Docker***
- Restaurant platform with four UIs (customer web, admin, kitchen, staff) synced in real time over Socket.IO, including Flutter kitchen and staff apps.
- Fully Dockerized with Nginx and nightly PostgreSQL backups.

Mufar POS 2.0 and Mufar POS v1 – ***Electron, React, TypeScript, Vite, SQLite***
- POS 2.0: offline-first Windows retail POS sold as a one-time-purchase installer (electron-builder NSIS), with SQLite repositories for sales, purchases, returns, stock, ledger, expenses, cash register, customers, and suppliers, plus receipt printing and auto-backup.
- POS v1: commercial multi-tenant retail POS with an Electron desktop client and API layer for reports, inventory, purchase returns, POS payments, and per-store handling.

FamilyGameHub – ***Fastify, Socket.IO, PostgreSQL, Drizzle, Expo, pnpm, Turborepo***
- Server-authoritative real-time multiplayer platform (Chess, Ludo, Snake & Ladder, Tic-Tac-Toe) in a pnpm + Turborepo monorepo with pure-TypeScript game engines, an Expo Android app, and 90+ unit tests.

GateWatch Vaniyambadi – ***Next.js 15, Express, MongoDB*** Render, Vercel
- Real-time railway-gate monitoring with a public status feed, admin gate control, train and route management, feedback, statistics, and dark mode.

Mufar Deen – ***Expo, React Native, SQLite, SecureStore, Jest***
- Mobile app with adhan prayer times, push notifications, offline SQLite storage, and secure storage; covered by Jest tests.

Other Projects
- Electron desktop AI interview assistant; full-stack e-commerce application (Next.js, Node.js, Express.js, MongoDB, JWT); personal Next.js portfolio.

Education

Islamiah College (Autonomous) Vaniyambadi, Tamil Nadu
Bachelor of Science – Computer Science | ***First Class with Distinction*** *Jul 2021 – May 2024*

Islamiah Boys Higher Secondary School Vaniyambadi, Tamil Nadu
HSC (Class XII) | Percentage: 82% *Jun 2020 – Mar 2021*

Islamiah Boys Higher Secondary School Vaniyambadi, Tamil Nadu
SSLC (Class X) | Percentage: 74% *Jun 2018 – Apr 2019*

Certifications

The Web Developer Bootcamp – Udemy
Learning Java 11 – LinkedIn Learning
Virtual Internship Program – ICT Academy
CSS (Basic), **JavaScript (Basic & Intermediate)**, **React (Basic)** – HackerRank
